

Sololift2

End-of-Life Information

Grundfos Sololift2 lifting stations must be disposed of according to local regulations by using a public or private waste collection service. If this is not possible, contact the nearest Grundfos company or service workshop.

Safety Risk

- Safety related to materials used
There is no risk to people during the disassembly process posed by the materials used for the product.
- Safety related for handling the product
There is no risk for people when handling the product.

Disassembly of the Product

Each part of the product is provided with a label, that shows the material from which it was made.

The materials of the components of the product are:

- Polypropylene (PP)
- Rubber material (EPDM)
- Iron
- Copper
- Electronic scrap

and can therefore be recycled to a large extent – depending on the national possibilities for recycling.

The Sololift2s are assembled by using screws and can be disassembled with standard tools
