

Unilift KP

End-of-Life Information

Grundfos Unilift KP pumps must be disposed of according to local regulations by using a public or private waste collection service. If this is not possible, contact the nearest Grundfos company or service workshop.

Safety Risk

- Safety related to materials used
There is no risk for people during the disassembly process posed by the materials used for the product.
- Safety related for handling the product
There is no risk for people when handling the product. The pump contains a non-toxic liquid which can be disposed to the drain.

Disassembly of the Product

The main materials of the components are:

- Stainless steel
- Aluminium
- Copper

and can therefore be recycled to a large extend – depending on the national possibilities for recycling.

The motor is assembled by using screws and bolts and can be disassembled with standard tools. There are no loose parts inside the motor.

Designation	Name	Material	Special Disassembly Consideration
1	Housing	Stainless steel	
2	Stator housing	Stainless steel	
3	Rotor	Iron, Copper and Aluminium	
4	Bearing	Stainless steel	
5	Impeller	Stainless steel	
6	Housing	Stainless steel	
7	Cover	Stainless steel	
Additional materials:		Screws, gaskets etc.: Various materials (steel, NBR) less than 5% of weight
